

IMS_PROJECT_01

Brief

This project does model deforestation using cellular automata.

Any screenshot of map from [mapy.cz](#) can be represented as letter map. Using [map_to_array_generator.py](#). This map is used in [map.h](#).

Usage of CA

```
ims-ca >> output.txt
```

This letter generated map of deforestation prediction can be visualised using [visualise.py](#)
